GATE PHONE ACTIVATION FORM

Dear Oak Shores Homeowner:

Oak Shores Community Association (OSCA) has a gate phone service available to all **home** owners. The service is a telephone actuated entry gate opening device. This system will allow your family members and guests to enter through the entry gate after hours by calling you from the entry gate "Call Box" located just in front of the gate kiosk. There is a directory / listing of all members that have subscribed to the system with their access code.

The guest or non-member can call you using your code which will ring to your home/cell number. When you answer the phone, and after identifying the person that you would like to authorize to come in to the community, you would then press "9" on your phone while they are still connected and the gate will open.

You are taking full responsibility of your guest that enter into the Community through the Call Box system.
